VOL. 96 NO. 1–3 DESALINATION 1994

CONTENTS

Session A-1: New Developments in Desalination

Chairmen: Gordon Leitner (USA), M.H. Ali El-Saie (Egypt), Shoji Kimura (Japan)

Performance characteristics of a multi effect solar pond desalting system in an arid environment
by O. Al Hawaj and M.A. Darwish (Kuwait) 3

The TWIN™ permeator – Development and commercialization of a new RO device
by T.J. Eckman, I. Moch, Jr., and C.P. Shields (USA) 11

The development of a new electrodialysis system for brackish water
by T. Hamano (Japan), P.B. Chebi, L. Gerdes, and T.D. Wolfe (USA) 23

Application of chlorine-resistant polyamide RO membrane with a hollow fiber configuration
by K. Nita, K. Numata, S. Gotoh, and Y. Matsui (Japan) 33

Research experiences from operational difficulties – Yuma Desalting Plant, USA
by S.H. Suemoto, L.A. Haugseth, and C.D. Moody (USA) 43

Development of large capacity high efficiency mechanical vapor compression (MVC) units
by Z. Zimerman (Israel) 51

A new multiple-effect distiller system with compact heat exchangers
by H. Morsy, D. Larger, and K. Genthner (Germany) 59

The application of a novel chemical treatment program to mitigate scaling and fouling in reverse osmosis units
by A.E. Jaffer (Saudi Arabia) 71

Increased water production using a heat recovery engine for "direct drive" VARI-RO™ pumping
by W.D. Childs and A.E. Dabiri (USA) 81

Possible applications of fuzzy controllers for chemical phosphate elimination
by F. Gebhardt and J. Maschlanka (Germany) 89

An assessment of an ejectocompression desalination process
by O.A. Hamed and K.A. Ahmed (UAE) 103

Noble reverse osmosis composite membrane
by K. Ikeda (Japan) and J. Tomaschke (USA) 113

The Yathrib system
by S. Imam and S. Begum (Saudi Arabia) 119

A new type of electrodialyzer
by Jiang Weida (China) 127

Development of crosslinked fully aromatic polyamide ultra-thin composite membranes for seawater desalination
by M. Kurihara, Y. Fusaoka, T. Sasaki, R. Bairinji, and T. Uemura (Japan) 133

A study of the modified reinforced polysulfone membrane and its pilot scale-up
by Liu Yu-rong, Chen Yi-ming, Wang Li-ning, and Chen Dong-sheng (China) 145

Research on polyethersulfone, polyarylsulfone and polyetheretherketone with cardo membranes
by Lu Xueren and Gao Congjie (China) 155

Comparative study of flash evaporation rates
by O. Miyatake (Japan) 163

Seawater desalination in thin film plants
by V. Slesarenko (Russia) 173

Stand-alone thermal desalination plants
by V.G. Rifert, P.A. Barabash, N.N. Goliyad, and E.B. Kurilova (Ukraine) 183

New disinfection method on RO seawater desalination systems
by S. Tanaka, K. Numata, H. Kuzumoto, and M. Sekino (Japan) 191

Session A-2: Regional Reviews of Desalination Practices

Chairmen: Ahmed Al-Mudaiheem (Saudi Arabia), Haruhiko Ohya (Japan)

Groundwater treatment in the Central Region of Saudi Arabia
by A.I. Abdula'aly and A.A. Chammem (Saudi Arabia) 203

Performance of reverse osmosis membrane in Jeddah Phase 1 plant
by Y. Ayyash, H. Imai, T. Yamada, T. Fukuda, Y. Yanaga, and T. Taniyama (Japan) 215

Cleaning and regeneration of membranes in desalination and waste water applications: State-of-the-art
by S. Ebrahim (Kuwait) 225

Desalination research – Current needs and approaches. A U.S. perspective
by L. Herbranson and S.H. Suemoto (USA) 239

Role of evaporative and membrane desalination technology in solving drinking water problem in India
by H.K. Sadhukhan, M.P.S. Ramani, B.M. Misra, R.K. Verma, and M.S. Hanra (India) 249

Analysis of RO elements operated at more than 80 plants in Japan
by K. Tasaka, T. Katsura, H. Iwahori, and Y. Kamiyama (Japan) 259

Maintenance philosophy and approach for a dual purpose plant
by S. Khalaf and A. Al Alawi (Bahrain) 273

Test result of the intermittent chlorine injection method in Jeddah 1 plant
by N. Nada (Saudi Arabia), H. Iwahashi, and F. Umemori (Japan) 283

The behavior of oxidizing/reducing agent in seawater
by M. Nagai, H. Iwahashi, Y. Hayashi, and Y. Ogino (Japan) 291

Reliable supply of drinking water through use of high performance B-10 TWIN permeators. A one year case history at Das Island, UAE
by H.W. Pohland, A.B. Hamida, and K. Chida (USA) 303

Session A-3: Process Design, Construction and Operation of Desalination Plants

Chairmen: Darwish Al-Gobaisi (UAE), Wil Pergande (USA), Shigeki Toyama (Japan)

A full decade of operating experience on Al-Khobar-II multi-stage flash (MSF) evaporators (1982–1992)
by M.A.K. Al-Sofi, M.A. Al-Hussain, A.A. Al-Omran and K.M. Farran (Saudi Arabia) 313

12 migd multistage flash desalination plant – A challenge for the next years
by R. Borsani, P. Bozzini, A. Germanà, P. Peluffo (Italy) and A. Al Radif (UAE) 325

Construction and operation experience of a large-scale electrodialysis water desalination plant
by T. Kawahara (Japan) 341

Operating report of the largest reverse osmosis desalting plant
by E.M. Lohman (USA) 349

Reverse osmosis seawater desalination for power plant
by M. Noshita (Japan) 359

Design and operation of a 5 ml/d RO desalination plant in arid Australia
by B. Watson, G. Marks, E. Gabbrielli, and L. Chapple (Australia) 369

Seawater desalination plant "Sirte" – an example for an advanced MSF design
by G.F. Tusel, R. Rautenbach, and J. Widua (Germany) 379

Factors affecting the design of a pre-treatment system for a 1,200 m^3/d
RO plant in Riyadh, Saudi Arabia with an iron-rich, 60° feed water
by K.J. McGlone, E.G. Darton, D.J. Langdown, and A. Rahman (UK) 397

Scale formation and fouling problems and their predicted reflection
on the performance of desalination plants in Saudi Arabia
by M. Al-Ahmad and F.A. Aleem (Saudi Arabia) 409

Controlling loss of salt rejection and water flux at the Yuma Desalting Plant
by A.C.F. Ammerlaan, J.C. Franklin, and C.D. Moody (USA) 421

The effect of heavy metal ions on the oxidation of cellulose triacetate membranes
by N. Fujiwara, K. Numata, A. Kumano, Y. Ogino, M. Nagai,
and H. Iwahashi (Japan) 431

The reference and analysis of a double-element type hollow fiber RO
module in seawater desalination
by N. Fujiwara, T. Fukuda, Y. Yanaga, M. Sekino, and T. Goto (Japan) 441

Performance change formula of cellulose triacetate hollow fiber RO
membranes due to oxidation and hydrolysis
by A. Kumano, Y. Matsui, K. Numata, N. Fujiwara, H. Iwahashi,
and M. Nagai (Japan) 451

A way to solve trouble encountered in one RO system
by Xing He Zhang (China) 459

Performance of commercial seawater membranes
by M. Wilf and K. Klinko (USA) 465

Author index 479
